CAFE DOS | CLIENT QUESTIONNAIRE

Part 1 of 13 | Equipment, orders and payments

52 questions, including printing. Tick one answer per question. Use Not sure or Other when needed. No answers have been preselected.

Name: _____ Role: _____ Date: _____

1. Can one device stay switched on during opening hours to connect the cashier, barista screen and printers?

This device would help orders and printing continue if the internet stops working, as long as the cafe Wi-Fi still works.

☐ A. Yes, we can provide a dedicated device.

☐ B. We can use an existing counter computer.

☐ C. No, we only have tablets or phones.

☐ Not sure / discuss with us. ☐ Other: _____

Device details, if known: _____

2. Should the barista receive an order before or after the customer pays?

This decides when staff can start making the drinks.

☐ A. Only after payment is confirmed.

☐ B. The cashier can send the order before payment.

☐ C. Allow both, depending on dine-in or takeout.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

3. Which starting arrangement do you prefer for dine-in and takeout?

Answer this even if you chose both options in Question 2. If the same rule applies to every order, choose the matching answer below.

☐ A. Dine-in can be sent before payment; takeout waits for payment.

☐ B. Cashier can send both dine-in and takeout before payment.

☐ C. Both wait for payment at first; the owner can change this later.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

4. Which payment methods should the first version support?

Manually checked means staff confirms the payment in the cafe's GCash account or card terminal, then records it in this system.

☐ A. Cash, plus manually checked GCash and card payments.

☐ B. Cash only.

☐ C. Cash, plus GCash/card payments processed directly by the new system.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 2 of 13 | Loyalty: earning and using points

Name: _____ Role: _____ Date: _____

5. What should customers be able to do with points when the internet is down?

Points earned offline can wait to be added to the customer's account after the connection returns.

☐ A. Earn points, but wait for internet before using points for a discount.

☐ B. Earn and use points through the cafe's local device, if supported.

☐ C. Leave points redemption out of the first version.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

6. What should customers receive when they use their points?

Earning is planned at 1 point for every PHP100 of qualifying spending.

☐ A. 1 point gives a PHP1 discount.

☐ B. A fixed reward, such as a free drink after collecting enough points.

☐ C. Owner sets the value later; customers cannot use points until it is set.

☐ Not sure / discuss with us. ☐ Other: _____

Reward/value details: _____

7. If a customer spends PHP165, what should happen to the extra PHP65?

This is about how spending adds up toward points, not how much each point is worth.

☐ A. Give 1 point. Do not carry the extra PHP65 to another purchase.

☐ B. Give 1 point and carry the PHP65 toward the next point.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

8. If points reduce a PHP200 bill to PHP180, how many new points should the customer earn?

This decides whether the part paid with points also earns more points.

☐ A. 1 point: calculate from PHP180 paid after discounts and points.

☐ B. 2 points: calculate from PHP200 before points were used.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 3 of 13 | Approvals, costing and stock

Name: _____ Role: _____ Date: _____

9. Who may approve refunds or cancel drinks after preparation has started?

Staff can request approval if they cannot approve the action themselves.

☐ A. Owner or manager only.

☐ B. Cashiers may also approve, with a recorded reason.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

10. When a new delivery costs more or less, how should the system estimate ingredient cost?

Example: 1 kg of beans costs PHP800 and another 1 kg costs PHP1,000. Their average cost is PHP900 per kg. Old sales keep their recorded costs.

☐ A. Use the average cost of the old stock and new delivery.

☐ B. Use the latest purchase price for future recipe estimates.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

11. What should happen if the system says there are not enough ingredients for an order?

Recorded stock can differ from what is physically on the shelf.

☐ A. Block the affected drink unless an owner/manager approves an override.

☐ B. Warn staff, allow the sale and flag the shortage for checking.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

12. Should unused loyalty points expire?

Expiry means unused points are removed after a set period.

☐ A. No expiry.

☐ B. Expire 12 months after the points were earned.

☐ C. Start with no expiry; let the owner set an expiry policy later.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 4 of 13 | Refunds, split payments and customer activity

Name: _____ Role: _____ Date: _____

13. When a purchase is refunded, what should happen to its points?

For a partial refund, only the matching share of points is adjusted.

□ A. Remove points earned from the refunded part and return points used for that part.

□ B. Let the manager decide the points adjustment for each refund.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

14. What if a refunded purchase earned points that the customer has already used?

The system may need to remove points that are no longer available in the account.

□ A. Allow a below-zero points balance; future points clear it before more can be used.

□ B. Flag it for the owner/manager to review and resolve manually.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

15. May one order be paid using more than one payment method?

Example: PHP100 cash plus PHP65 GCash for a PHP165 order.

□ A. Yes, allow split payments.

□ B. No, use one payment method per order at first.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

16. How long without a purchase should make a customer count as inactive?

This helps the owner see customers who have stopped visiting.

□ A. 30 days.

□ B. 60 days.

□ C. Start at 30 days; allow the owner to change the number of days.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 5 of 13 | VIPs, discounts and preparation

Name: _____ Role: _____ Date: _____

17. How should a customer qualify as a VIP?

The dashboard can highlight customers who meet the rule you select.

☐ A. Total lifetime spending.

☐ B. Number of completed purchases.

☐ C. Owner chooses either spending or purchase count and sets the target.

☐ Not sure / discuss with us. ☐ Other: _____

Target, if known: _____

18. Who may apply discounts?

Preset discounts are options already set up by the owner. Custom discounts are amounts or percentages entered during checkout.

☐ A. Cashiers may use presets; custom discounts need owner/manager approval.

☐ B. All discounts need owner/manager approval.

☐ C. Cashiers may use presets and custom discounts, with a recorded reason.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

19. Should using loyalty points also need owner/manager approval?

The system still checks the customer's available points online in either case.

☐ A. No. Cashiers may use points after the online check.

☐ B. Yes. Require owner/manager approval and the online check.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

20. When should the system subtract the ingredients used for a drink?

This controls the recorded stock count. Ingredients can be reserved earlier without subtracting them from physical stock.

☐ A. When the order is sent to the barista.

☐ B. When the barista marks the drink ready.

☐ C. When the customer pays.

☐ Not sure / discuss with us. ☐ Other: _____

Notes: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 6 of 13 | Refund allocation and cash control

Name: _____ Role: _____ Date: _____

21. For a partial refund on a split payment, how should money be returned?

Example: the customer originally paid with both cash and GCash.

□ A. Return the refund in the same proportions as the original payment.

□ B. Manager chooses the amounts, without exceeding what remains refundable on each original method.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

22. How should tablets/registers share cash drawers?

Each drawer has its own opening cash, cash movements and closing count.

□ A. All cashier tablets share one drawer and one shift balance.

□ B. Each register has a separate drawer and shift balance.

□ C. Support both; the owner assigns registers to drawers.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

23. Should staff see the expected cash amount before entering what they counted?

A blind count means staff enters the physical cash count without seeing the amount the system expects.

□ A. Blind count: only owner/manager sees expected cash and any difference.

□ B. Show staff the expected cash amount during closing.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

24. Who should finalize the shift after staff submits the cash count?

A shift is the period of cash activity being opened and closed.

□ A. Owner/manager reviews and approves closure.

□ B. Staff closes immediately; manager reviews differences later.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 7 of 13 | Closing, alerts and launch scope

Name: _____ Role: _____ Date: _____

25. While a drawer waits for closing approval, should it accept more cash transactions?

New cash movements change the amount being checked.

□ A. Pause cash movements on that drawer; use another open drawer if available.

□ B. Allow them, but require a new count whenever the cash changes.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

26. Where should the owner/manager receive low-stock alerts?

SMS means text messages and would require a provider and a usage budget.

□ A. Inside the dashboard only at first.

□ B. Dashboard plus email.

□ C. Dashboard plus SMS/text messages.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

27. How many branches should operate on the first release?

The system can be structured for future branches even if only one is used at launch.

□ A. One branch first; prepare for adding branches later.

□ B. Multiple branches immediately, including stock transfers and separate reports.

□ Not sure / discuss with us. □ Other: _____

Notes: _____

28. What should the new system issue when a customer pays?

An internal order/payment slip is different from the cafe's official sales invoice. Please confirm the required process with the owner or accountant.

□ A. Official sales invoices from the new system.

□ B. Internal slips first; official invoices continue through the existing process.

□ C. Confirm with the owner/accountant later, before live checkout begins.

□ Not sure / discuss with us. □ Other: _____

Current process: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 8 of 13 | Printers, connections and output routing

Additional setup questions: not answered in the earlier planning interview.

Name: _____ Role: _____ Date: _____

29. What devices will staff use?

List the cashier tablets, barista screens and any counter computer, including the brand/model if known.

☐ A. Use the devices we already have.

☐ B. We need help choosing or adding devices.

☐ Not sure / discuss with us. ☐ Other: _____

Models, quantities and Android/iPad/Windows: _____

30. Do you already have printers for customer slips, preparation tickets or cup stickers?

A normal receipt printer may not be able to print adhesive cup labels.

☐ A. Yes, we want to reuse them if compatible.

☐ B. No, we need printer recommendations.

☐ C. Some are available; we may need additional printers.

☐ Not sure / discuss with us. ☐ Other: _____

Printer brand/model and purpose: _____

31. How do your printers connect, and what paper or label size do they use?

If unknown, write Not sure. The development team will check compatibility before promising printing.

☐ A. Wi-Fi or network cable.

☐ B. Bluetooth.

☐ C. USB cable.

☐ D. Different printers use different connections.

☐ Not sure / discuss with us. ☐ Other: _____

Which printer, connection and paper/label size: _____

32. Which outputs do you need?

Choose one arrangement. Customer slips stay at checkout; preparation tickets go to the barista.

☐ A. Customer slip and cup stickers; preparation stays on the screen.

☐ B. Customer slip, cup stickers and a printed preparation ticket.

☐ C. Customer slip and on-screen preparation only; no cup stickers.

☐ D. A different arrangement, described below.

☐ Not sure / discuss with us. ☐ Other: _____

Where each printer will be placed: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 9 of 13 | Printing rules and print content

Additional setup questions: not answered in the earlier planning interview.

Name: _____ Role: _____ Date: _____

33. When should a customer payment slip print?

Official invoice requirements must still be confirmed separately in Question 28.

☐ A. Automatically after the full order is paid.

☐ B. Only when staff presses Print or the customer requests it.

☐ C. Do not print internal payment slips; use the existing invoice process.

☐ Not sure / discuss with us. ☐ Other: _____

Copies needed per order: _____

34. How many cup stickers should print?

Example: one order contains three drinks.

☐ A. One sticker per drink/cup, including separate copies for quantities.

☐ B. One sticker for the whole order.

☐ C. Owner decides which menu items need stickers.

☐ Not sure / discuss with us. ☐ Other: _____

Other quantity or timing instructions: _____

35. What details should appear on cup stickers and customer slips?

Proposed sticker: drink, size, customizations, order/table number. Proposed slip: items, prices, discounts, payments and change.

☐ A. Use those starting details, then review a sample print.

☐ B. We have an existing format to provide.

☐ C. We need a different format, described below.

☐ Not sure / discuss with us. ☐ Other: _____

Add/remove details, logo or language: _____

36. Who can print another copy if a slip or sticker is lost or damaged?

Extra copies can be marked Reprint and recorded so the same drink is not made twice.

☐ A. Staff can reprint, with the action recorded.

☐ B. Every reprint needs owner/manager approval.

☐ C. Staff can reprint stickers; customer slip copies need approval.

☐ Not sure / discuss with us. ☐ Other: _____

Reason or copy-limit rules: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 10 of 13 | Printing fallback, menu and waste

Additional setup questions: not answered in the earlier planning interview.

Name: _____ Role: _____ Date: _____

37. If printing fails, how should service continue?

The system will show the failed or uncertain print job instead of claiming it printed.

□ A. Continue with the barista screen or handwritten labels; retry printing separately.

□ B. Pause the affected order until staff fixes the printer.

□ C. Use a backup printer if available; otherwise use a manual fallback.

□ Not sure / discuss with us. □ Other: _____

Current fallback and backup printer: _____

38. How should we collect your drink sizes and customization choices?

We need the selling price and ingredient changes for choices such as oat milk, extra shots, sweetness and size.

□ A. We will provide a menu and a recipe/customization sheet.

□ B. We need the team to help prepare this with the owner/barista.

□ Not sure / discuss with us. □ Other: _____

Who will provide or approve it: _____

39. Do dine-in and takeout orders use different cups, lids or other packaging?

This affects which packaging is deducted from stock.

□ A. Yes, keep separate packaging rules.

□ B. No, use the same packaging.

□ C. Some items differ; we will list them.

□ Not sure / discuss with us. □ Other: _____

Differences or exceptions: _____

40. Who may correct a saved waste or dial-in entry?

Corrections keep the original entry and record who changed it.

□ A. Owner/manager only; staff requests a correction.

□ B. Staff can correct their own entries with a reason.

□ Not sure / discuss with us. □ Other: _____

Any correction time limit: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 11 of 13 | Customer details, points and business days

Additional setup questions: not answered in the earlier planning interview.

Name: _____ Role: _____ Date: _____

41. What information should staff use to find a loyalty customer?

Decide what is required and avoid collecting details the cafe does not need.

☐ A. Name and mobile number.

☐ B. Name and a customer code/card; mobile number optional.

☐ C. Customer chooses a mobile number or customer code.

☐ Not sure / discuss with us. ☐ Other: _____

Required fields and permission/notice process: _____

42. What is the minimum number of points a customer may use?

Each point gives PHP1 off, subject to the approval and balance checks already discussed.

☐ A. Any whole number, starting at 1 point.

☐ B. A minimum set by the owner.

☐ Not sure / discuss with us. ☐ Other: _____

Minimum points, if applicable: _____

43. When may points earned from a purchase be used?

Allowing them on the same order makes checkout and point calculation more complex.

☐ A. Only on a later purchase, after the points are confirmed.

☐ B. On the same purchase if the system can validate the calculation.

☐ Not sure / discuss with us. ☐ Other: _____

Any extra restrictions: _____

44. If service continues after midnight, which day should those sales belong to?

Example: a drink sold at 12:30 AM may belong to the new calendar day or the previous evening's business day.

☐ A. Use calendar days: the new day starts at midnight.

☐ B. Use an owner-set closing time for the business day.

☐ Not sure / discuss with us. ☐ Other: _____

Opening hours and business-day cutoff: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 12 of 13 | Backups, invoice setup and migration

Additional setup questions: not answered in the earlier planning interview.

Name: _____ Role: _____ Date: _____

45. What backup and recovery arrangement should we plan?

A backup helps recover records after a device fails. Someone must be responsible for checking recovery.

☐ A. Automatic backups; agree recovery details with the owner.

☐ B. Use the cafe's existing backup process after the team checks it.

☐ Not sure / discuss with us. ☐ Other: _____

Contact and acceptable downtime/data-loss window: _____

46. Who will confirm the tax, discount and official invoice setup?

Provide the actual business requirements; the team will not guess from the menu prices.

☐ A. Owner will provide the approved details.

☐ B. Accountant/bookkeeper will confirm them.

☐ C. Both owner and accountant/bookkeeper will confirm.

☐ Not sure / discuss with us. ☐ Other: _____

Name/contact and details still needed: _____

47. What information should move from Loyverse into the new system?

Recipe ingredients, raw-material quantities and customer data may need separate source files. Choose the closest answer and list exceptions.

☐ A. Menu and prices only.

☐ B. Menu, prices and starting stock.

☐ C. Those items plus customer/loyalty data, if the source allows it.

☐ Not sure / discuss with us. ☐ Other: _____

Available files and other data needed: _____

48. How should the cafe switch to the new system?

The final stock and customer balances need a clear cutoff to avoid counting sales twice.

☐ A. Switch on an agreed day after training and acceptance checks.

☐ B. Run a supervised trial first, then agree the live switch-over.

☐ Not sure / discuss with us. ☐ Other: _____

Preferred trial/date, trainer and final approver: _____

CAFE DOS | CLIENT QUESTIONNAIRE

Part 13 of 13 | Staff access, expenses and acceptance

Additional setup questions: not answered in the earlier planning interview.

Name: _____ Role: _____ Date: _____

49. How should staff identify themselves at a shared tablet?

Individual sign-ins help trace orders, waste and cash actions to the person who performed them.

☐ A. Each staff member has an individual PIN for quick sign-in.

☐ B. Each staff member uses a full username/password sign-in.

☐ Not sure / discuss with us. ☐ Other: _____

Staff list, roles and device-sharing details: _____

50. How should a manager approve a staff request?

This covers discounts, point use, refunds and closing requests. A manager still uses their own secure sign-in.

☐ A. Approve at the counter device.

☐ B. Approve from a separate manager device.

☐ C. Support both, subject to connection availability.

☐ Not sure / discuss with us. ☐ Other: _____

Who is available during each shift: _____

51. How should rent, wages, utilities and other running costs be entered?

These costs are separate from the ingredients used in each drink and are visible only to authorized admins.

☐ A. Owner/manager enters them manually.

☐ B. Import them from a spreadsheet.

☐ C. Support both.

☐ Not sure / discuss with us. ☐ Other: _____

Categories, frequency and responsible person: _____

52. Who will check the system before live use, and what must work first?

The team should demonstrate checkout, printing, kitchen orders, stock, loyalty and closing with the cafe staff.

☐ A. Owner and nominated staff will review a supervised demo.

☐ B. Owner/manager signs off after a staff trial.

☐ Not sure / discuss with us. ☐ Other: _____

Approver and top three priorities: _____
